Assignment Specifications:
Computing Science with Industrial Placement,
Information Systems (Industrial Placement)

Assignment 3: Presentation

Due date: Aug 2014 (dates tbc)

Objectives
- To concisely summarise work experience during the placement year
- To present a reflective review of the achievements and lessons learnt

Summary

Prepare a powerpoint presentation to last 15 minutes (including questions) summarising your placement year: your experience, responsibilities, achievements and lessons learnt.

The presentation is to be delivered to an audience including other placement students, Computing Science staff and your industrial supervisors (where possible). The venue of the presentation will either be at the university or if this is not practicable, alternative arrangements will be made such as a virtual net meeting (WebEx or Collaborate) or a company venue.

Assessment criteria

The submission will be marked out of 10. This submission constitutes 10% of the total assessment for the Industrial Placement. The placement year itself is assessed as pass/fail; marks for the individual assignments do not contribute to your overall degree classification, which is awarded based on your stage 2 and stage 3 marks.

Marks of 7 or above will be obtained for a well-presented, clearly framed presentation summarising experience, responsibilities, achievements and lessons learnt.

Submission

Upload the powerpoint file for your presentation to Ness.

Problems

In case of problems, contact the Placements Programme Coordinator: Steve Riddle, steve.riddle@ncl.ac.uk, tel 0191 222 5156.
